

Another conjecture about reloids and funcoids

OPG-59970

L1 - TRACTABLE

PARTIALLY SOLVED

Topology

ORIGINAL PROBLEM STATEMENT

Definition $\Box f = \bigcap^{\text{RLD}} \text{up}^{\Gamma(\text{Src } f; \text{Dst } f)} f$ for reloid f .

Conjecture $(\text{RLD})_{\Gamma} f = \Box(\text{RLD})_{\text{in}} f$ for every funcoid f .

Note: it is known that $(\text{RLD})_{\Gamma} f \neq \Box(\text{RLD})_{\text{out}} f$ (see below mentioned online article).
