

Atomicity of the poset of multifuncoids

OPG-37388

L1 - TRACTABLE

PARTIALLY SOLVED

Topology

ORIGINAL PROBLEM STATEMENT

Conjecture The poset of multifuncoids of the form $(\mathcal{P}\mathfrak{U})^n$ is for every sets $\mathfrak{U}$ and n :

- atomic;
- atomistic.

See below for definition of all concepts and symbols used to in this conjecture.

Refer to this Web site for the theory which I now attempt to generalize.
