ORIGINAL PROBLEM STATEMENT

Conjecture For composable reloids f and g it holds

- $\text{Compl}(g \circ f) = (\text{Compl } g) \circ f$ if f is a co-complete reloid;
- $\text{CoCompl}(f \circ g) = f \circ \text{CoCompl } g$ if f is a complete reloid;
- $\text{CoCompl}((\text{Compl } g) \circ f) = \text{Compl}(g \circ (\text{CoCompl } f)) = (\text{Compl } g) \circ (\text{CoCompl } f)$;
- $\text{Compl}(g \circ (\text{Compl } f)) = \text{Compl}(g \circ f)$;
- $\text{CoCompl}((\text{CoCompl } g) \circ f) = \text{CoCompl}(g \circ f)$.
