

Erdős Problem #1054

EP-1054

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $f(n)$ be the minimal integer m such that n is the sum of the k smallest divisors of m for some $k \geq 1$. Is it true that $f(n) = o(n)$? Or is this true only for almost all n , and $\limsup f(n)/n = \infty$?
