

Erdős Problem #1062

EP-1062

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $f(n)$ be the size of the largest subset $A \subseteq \{1, \dots, n\}$ such that there are no three distinct elements $a, b, c \in A$ such that $a \mid b$ and $a \mid c$. How large can $f(n)$ be? Is $\lim f(n)/n$ irrational?
