

Erdős Problem #1106

EP-1106

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $p(n)$ denote the partition function of n and let $F(n)$ count the number of distinct prime factors of $\prod_{1 \leq k \leq n} p(k)$. Does $F(n) \rightarrow \infty$ with n ? Is $F(n) > n$ for all sufficiently large n ?
