

Erdős Problem #168

EP-168

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $F(N)$ be the size of the largest subset of $\{1, \dots, N\}$ which does not contain any set of the form $\{n, 2n, 3n\}$. What is $\lim_{N \rightarrow \infty} \frac{F(N)}{N}$? Is this limit irrational?
