

Erdős Problem #241

EP-241

L1 - TRACTABLE

OPEN

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $f(N)$ be the maximum size of $A \subseteq \{1, \dots, N\}$ such that the sums $a + b + c$ with $a, b, c \in A$ are all distinct (aside from the trivial coincidences). Is it true that $f(N) \sim N^{1/3}$?
