

# Erdős Problem #289

EP-289

L1 - TRACTABLE

OPEN

Graph Theory

## ORIGINAL PROBLEM STATEMENT

Is it true that, for all sufficiently large  $k$ , there exist finite intervals  $I_1, \dots, I_k \subset \mathbb{N}$ , distinct, not overlapping or adjacent, with  $|I_i| \geq 2$  for  $1 \leq i \leq k$  such that  $1 = \sum_{i=1}^k \sum_{n \in I_i} \frac{1}{n}$ ?
