

Erdős Problem #311

EP-311

L1 - TRACTABLE

OPEN

Graph Theory

ORIGINAL PROBLEM STATEMENT

Let $\delta(N)$ be the minimal non-zero value of $|1 - \sum_{n \in A} \frac{1}{n}|$ as A ranges over all subsets of $\{1, \dots, N\}$. Is it true that $\delta(N) = e^{-(c+o(1))N}$ for some constant $c \in (0, 1)$?
