

Erdős Problem #312

EP-312

L1 - TRACTABLE

OPEN

Number Theory

ORIGINAL PROBLEM STATEMENT

Does there exist some $c > 0$ such that, for any $K > 1$, whenever A is a sufficiently large finite multiset of positive integers with $\sum_{n \in A} \frac{1}{n} > K$ there exists some $S \subseteq A$ such that $1 - e^{-cK} < \sum_{n \in S} \frac{1}{n} \leq 1$?
