

Erdős Problem #326

EP-326

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $A \subset \mathbb{N}$ be an additive basis of order 2. Must there exist $B = \{b_1 < b_2 < \dots\} \subseteq A$ which is also a basis such that $\lim_{k \rightarrow \infty} \frac{b_k}{k^2}$ does not exist?
