

Erdős Problem #385

EP-385

L1 - TRACTABLE

OPEN

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $F(n) = \max_{\substack{m < n \\ m \text{ composite}}} m + p(m)$, where $p(m)$ is the least prime divisor of m . Is it true that $F(n) > n$ for all sufficiently large n ? Does $F(n) - n \rightarrow \infty$ as $n \rightarrow \infty$?
