

Erdős Problem #423

EP-423

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $a_1 = 1$ and $a_2 = 2$ and for $k \geq 3$ choose a_k to be the least integer $> a_{k-1}$ which is the sum of at least two consecutive terms of the sequence. What is the asymptotic behaviour of this sequence?
