

Erdős Problem #463

EP-463

L1 - TRACTABLE

OPEN

Number Theory

ORIGINAL PROBLEM STATEMENT

Is there a function f with $f(n) \rightarrow \infty$ as $n \rightarrow \infty$ such that, for all large n , there is a composite number m such that $n + f(n) < m < n + p(m)$? (Here $p(m)$ is the least prime factor of m .)
