

Erdős Problem #528

EP-528

L1 - TRACTABLE

OPEN

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $f(n, k)$ count the number of self-avoiding walks of n steps (beginning at the origin) in $\mathbb{Z}^k$ (i.e. those walks which do not intersect themselves). Determine $C_k = \lim_{n \rightarrow \infty} f(n, k)^{1/n}$.
