

Erdős Problem #552

EP-552

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Determine the Ramsey number $R(C_4, S_n)$, where $S_n = K_{1,n}$ is the star on $n + 1$ vertices.

In particular, is it true that, for any $c > 0$, there are infinitely many n such that $R(C_4, S_n) \leq n + \sqrt{n} - c$?
