

Erdős Problem #560

EP-560

L1 - TRACTABLE

PARTIALLY SOLVED

Graph Theory

ORIGINAL PROBLEM STATEMENT

Let $\hat{R}(G)$ denote the size Ramsey number, the minimal number of edges m such that there is a graph H with m edges such that in any 2-colouring of the edges of H there is a monochromatic copy of G .

Determine $\hat{R}(K_{n,n})$, where $K_{n,n}$ is the complete bipartite graph with n vertices in each component.
