

Erdős Problem #663

EP-663

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $k \geq 2$ and $q(n, k)$ denote the least prime which does not divide $\prod_{1 \leq i \leq k} (n + i)$. Is it true that, if k is fixed and n is sufficiently large, we have $q(n, k) < (1 + o(1)) \log n$?
