

Erdős Problem #712

EP-712

L1 - TRACTABLE

OPEN

Graph Theory

ORIGINAL PROBLEM STATEMENT

Determine, for any $k > r > 2$, the value of $\frac{\text{ex}_r(n, K_k^r)}{\binom{n}{r}}$, where $\text{ex}_r(n, K_k^r)$ is the largest number of r -edges which can be placed on n vertices so that there exists no set of k vertices which is covered by all $\binom{k}{r}$ possible r -edges.
