

Erdős Problem #769

EP-769

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $c(n)$ be minimal such that if $k \geq c(n)$ then the n -dimensional unit cube can be decomposed into k homothetic n -dimensional cubes. Give good bounds for $c(n)$ - in particular, is it true that $c(n) \gg n^n$?
