

Erdős Problem #789

EP-789

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $h(n)$ be maximal such that if $A \subseteq \mathbb{Z}$ with $|A| = n$ then there is $B \subseteq A$ with $|B| \geq h(n)$ such that if $a_1 + \dots + a_r = b_1 + \dots + b_s$ with $a_i, b_i \in B$ then $r = s$.
Estimate $h(n)$.
