

Erdős Problem #791

EP-791

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $g(n)$ be minimal such that there exists $A \subseteq \{0, \dots, n\}$ of size $g(n)$ with $\{0, \dots, n\} \subseteq A + A$. Estimate $g(n)$. In particular is it true that $g(n) \sim 2n^{1/2}$?
