

# Erdős Problem #839

EP-839

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

## ORIGINAL PROBLEM STATEMENT

Let  $1 \leq a_1 < a_2 < \dots$  be a sequence of integers such that no  $a_i$  is the sum of consecutive  $a_j$  for  $j < i$ . Is it true that  $\limsup \frac{a_n}{n} = \infty$ ? Or even  $\lim_{\log x} \frac{1}{x} \sum_{a_n < x} \frac{1}{a_n} = 0$ ?
