

Erdős Problem #860

EP-860

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $h(n)$ be such that, for any $m \geq 1$, in the interval $(m, m + h(n))$ there exist distinct integers a_i for $1 \leq i \leq \pi(n)$ such that $p_i \mid a_i$, where p_i denotes the i th prime.

Estimate $h(n)$.
