

Erdős Problem #881

EP-881

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Let $A \subset \mathbb{N}$ be an additive basis of order k which is minimal, in the sense that if $B \subset A$ is any infinite set then $A \setminus B$ is not a basis of order k .

Must there exist an infinite $B \subset A$ such that $A \setminus B$ is a basis of order $k + 1$?
