

Erdős Problem #911

EP-911

L1 - TRACTABLE

OPEN

Graph Theory

ORIGINAL PROBLEM STATEMENT

Let $\hat{R}(G)$ denote the size Ramsey number, the minimal number of edges m such that there is a graph H with m edges that is Ramsey for G .

Is there a function f such that $f(x)/x \rightarrow \infty$ as $x \rightarrow \infty$ such that, for all large C , if G is a graph with n vertices and $e \geq Cn$ edges then $\hat{R}(G) > f(C)e$?
