

Erdős Problem #928

EP-928

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $\alpha, \beta \in (0, 1)$ and let $P(n)$ denote the largest prime divisor of n . Does the density of integers n such that $P(n) < n^\alpha$ and $P(n+1) < (n+1)^\beta$ exist?
