

Erdős Problem #975

EP-975

L1 - TRACTABLE

PARTIALLY SOLVED

Number Theory

ORIGINAL PROBLEM STATEMENT

Let $f \in \mathbb{Z}[x]$ be an irreducible non-constant polynomial such that $f(n) \geq 1$ for all large $n \in \mathbb{N}$. Does there exist a constant $c = c(f) > 0$ such that $\sum_{n \leq X} \tau(f(n)) \sim cX \log X$, where τ is the divisor function?
