

Odd cycles and low oddness

OPG-37182

L1 - TRACTABLE

PARTIALLY SOLVED

Graph Theory

ORIGINAL PROBLEM STATEMENT

Conjecture If in a bridgeless cubic graph G the cycles of any 2-factor are odd, then $\omega(G) \leq 2$, where $\omega(G)$ denotes the oddness of the graph G , that is, the minimum number of odd cycles in a 2-factor of G .
