

Saturated k -Sperner Systems of Minimum Size

OPG-59928

L1 - TRACTABLE

PARTIALLY SOLVED

Combinatorics

ORIGINAL PROBLEM STATEMENT

Question Does there exist a constant $c > 1/2$ and a function $n_0(k)$ such that if $|X| \geq n_0(k)$, then every saturated k -Sperner system $\mathcal{F} \subseteq \mathcal{P}(X)$ has cardinality at least $2^{(1+o(1))ck}$?
