

Sub-atomic product of funcoids is a categorical product

OPG-48715

L1 - TRACTABLE

PARTIALLY SOLVED

Algebra

ORIGINAL PROBLEM STATEMENT

Conjecture In the category of continuous funcoids (defined similarly to the category of topological spaces) the following is a direct categorical product:

- Product morphism is defined similarly to the category of topological spaces.
- Product object is the sub-atomic product.
- Projections are sub-atomic projections.
