

Turán's problem for hypergraphs

OPG-47343

L1 - TRACTABLE

OPEN

Graph Theory

ORIGINAL PROBLEM STATEMENT

Conjecture Every simple 3-uniform hypergraph on $3n$ vertices which contains no complete 3-uniform hypergraph on four vertices has at most $\frac{1}{2}n^2(5n - 3)$ hyperedges.

Conjecture Every simple 3-uniform hypergraph on $2n$ vertices which contains no complete 3-uniform hypergraph on five vertices has at most $n^2(n - 1)$ hyperedges.
