

Vertex Cover Integrality Gap

OPG-38188

L1 - TRACTABLE

PARTIALLY SOLVED

Logic

ORIGINAL PROBLEM STATEMENT

Conjecture For every $\varepsilon > 0$ there is $\delta > 0$ such that, for every large n , there are n -vertex graphs G and H such that $G \equiv_{\delta n}^C H$ and $\text{vc}(G) \geq (2 - \varepsilon) \cdot \text{vc}(H)$.
