

Erdős Problem #322

EP-322	L1 - Tractable	Partiellement résolu	Number Theory
--------	----------------	----------------------	---------------

Énoncé original (anglais, reproduction mot pour mot)

Let $k \geq 3$ and $A \subset \mathbb{N}$ be the set of k th powers. What is the order of growth of $1_A^{(k)}(n)$, i.e. the number of representations of n as the sum of k many k th powers? Does there exist some $c > 0$ and infinitely many n such that $1_A^{(k)}(n) > n^c$?
