

Erdős Problem #361

EP-361	L1 - Tractable	Ouvert	Number Theory
--------	----------------	--------	---------------

Énoncé original (anglais, reproduction mot pour mot)

Let $c > 0$ and n be some large integer. What is the size of the largest $A \subseteq \{1, \dots, \lfloor cn \rfloor\}$ such that n is not a sum of a subset of A ? Does this depend on n in an irregular way?
