

Erdős Problem #810

EP-810	L1 - Tractable	Ouvert	Graph Theory
--------	----------------	--------	--------------

Énoncé original (anglais, reproduction mot pour mot)

Does there exist some $\epsilon > 0$ such that, for all sufficiently large n , there exists a graph G on n vertices with at least ϵn^2 many edges such that the edges can be coloured with n colours so that every C_4 receives 4 distinct colours?
