

Hamilton cycle in small d -diregular graphs

OPG-47028	L1 - Tractable	Partiellement résolu	Graph Theory
-----------	----------------	----------------------	--------------

Énoncé original (anglais, reproduction mot pour mot)

An directed graph is k -diregular if every vertex has indegree and outdegree at least k .

Conjecture For $d > 2$, every d -diregular oriented graph on at most $4d+1$ vertices has a Hamilton cycle.
