

Turán's problem for hypergraphs

OPG-47343	L1 - Tractable	Ouvert	Graph Theory
-----------	----------------	--------	--------------

Énoncé original (anglais, reproduction mot pour mot)

Conjecture Every simple 3 -uniform hypergraph on $3n$ vertices which contains no complete 3 -uniform hypergraph on four vertices has at most $\frac{1}{2}n^2(5n-3)$ hyperedges.

Conjecture Every simple 3 -uniform hypergraph on $2n$ vertices which contains no complete 3 -uniform hypergraph on five vertices has at most $n^2(n-1)$ hyperedges.
