

Complexity of the H -factor problem.

OPG-46738

L1 - TRACTABLE

PARTIALLY SOLVED

Graph Theory

ORIGINAL PROBLEM STATEMENT

An H -factor in a graph G is a set of vertex-disjoint copies of H covering all vertices of G .

Problem Let c be a fixed positive real number and H a fixed graph. Is it NP-hard to determine whether a graph G on n vertices and minimum degree cn contains an H -factor?
